

# THESE are words that got a TN principal suspended | Glenn Beck

Memphis-area high school principal Barton Thorne was suspended by Shelby County School administrators in January after speaking with his students about the dangers of cancel culture. “I want you to understand the problem that’s going to face you and your generation if there is no longer a marketplace, a free exchange of ideas,” he told them, urging the students to engage in respectful conversations with those who hold differing opinions. Glenn reads the rest of Thorne’s words, and then he discusses with Thorne’s attorney, Daniel Suhr from the Liberty Justice Center, about how the district administrators can use their IMMENSE mistake as a teaching moment for the students under their charge.

# Great Reset's ESG 'Credit Scores' could affect EVERY aspect of your life

Glenn explains how The Great Reset may soon influence EVERY financial aspect of your life — from car loans, business loans, mortgages, and more. It's all thanks to the partnership between America's biggest banks, the federal government, and global groups like the World Economic Forum...and it has already begun: The Heartland Institute's Justin Haskins describes how Merrill Lynch now assigns ESG credit scores for customers. It may not affect you yet. But soon, a low score — based on things like products you buy or how much electricity you use — could SIGNIFICANTLY impact your life.

## What do enormous layers of coal reveal about Noah's Flood? - Dr. Kurt Wise

Taken from "Beyond Is Genesis History? Vol 1 : Rocks & Fossils."

Check it out on our website: <http://bit.ly/BIGH-1> After you've watched the documentary film and want to learn more, this is your next step. Explore the impact of the global flood on the Earth in these 20 new videos featuring scientists from the film. □

Purchase all three in the series here: <https://bit.ly/BIGH-Set> In this much-requested video, Del Tackett follows paleontologist Kurt Wise into the air shaft of an old coal mine in the Pocket Wilderness (Tennessee) where they discuss the origin of coal. Dr. Wise explains how the conventional model of coal formation in swamps is insufficient for explaining the coal beds we actually see. He talks about research done by Steve Austin in terms of floating log mats. Dr. Wise earned his BA in geology from the University of Chicago, and his MA and PhD degrees in

paleontology from Harvard University. He founded and directed the Center for Origins Research at Bryan College and taught biology there for 17 years. He then led the Center for Theology and Science at the Southern Baptist Theological Seminary for 3 years, before founding and directing the Center for Creation Research and teaching biology at Truett McConnell University for the last 7 years. His fieldwork has included research in early Flood rocks in the Death Valley region, late Flood rocks in Wyoming, and post-Flood caves in Tennessee. For more information on Dr. Kurt Wise, please go to <https://bit.ly/2zUN3U9>.
