

Great Reset's ESG 'Credit Scores' could affect EVERY aspect of your life

Glenn explains how The Great Reset may soon influence EVERY financial aspect of your life — from car loans, business loans, mortgages, and more. It's all thanks to the partnership between America's biggest banks, the federal government, and global groups like the World Economic Forum...and it has already begun: The Heartland Institute's Justin Haskins describes how Merrill Lynch now assigns ESG credit scores for customers. It may not affect you yet. But soon, a low score — based on things like products you buy or how much electricity you use — could SIGNIFICANTLY impact your life.

Finance Fascists: The Credit Chokehold That Will Bankrupt America | Glenn TV | Ep 92

“What's your climate credit score?” That's a question Americans may have to answer if the green global elites get their way. While the media has distracted us with Orange Man Bad! and Russia, Russia, Russia!, the Left has been busy working

on the fundamental transformation of America with a primary pressure point — YOUR money through YOUR bank. Democrats, forgetting the words of MLK, like to group people into categories. They judge you based on what skin color you have, your religion, occupation, your ideology, and now ... your carbon footprint. Glenn exposes how they're now planning not only to categorize you, but to give you a score. It'll determine everything for you: whether you can buy a home, get a new car, open a business ... EVERYTHING. And if you don't bend the knee? You'll be blacklisted. But this isn't some far-off conspiracy theory. Multiple big U.S. banks are part of a private U.S. financial group enacting these policies now. It's here, and we're ALL at risk. [#financefascists](#) [#glennbeck](#) [#blazetv](#)

Eugenics, Abortion, and Our Future: The Quest for Perfection | Answers in Genesis

“Those who cannot remember the past are condemned to repeat it.” Sadly, our culture is poised to repeat a grave error in the most serious of areas—human life. A tragic chapter in history began in the early 1900s with the rise of the eugenics (which means “well-born”) movement. Many prominent philanthropists, scientists, and politicians believed that the human race was degrading because the poor, sick, and deformed were cared for and therefore survived to reproduce. Because of their acceptance of molecules-to-man evolution, these cultural leaders believed that mankind would only progress if laws were passed to enforce sterilization and segregation of the “undesirables,” and if immigration and marriage of the same were restricted. Margaret Sanger embraced these ideas, and they were foundational in her establishment of Planned Parenthood. Although the eugenics movement lost momentum when it was associated with the horrors of the Nazi regime, it didn’t die. Instead it became “quiet and careful.” A resurgence of eugenics is brewing. Modern Planned Parenthood still advocates many eugenic ideals. As Christians it is our responsibility to view life from God’s perspective and to defend all of those who are created in His image. No matter how impaired a human life may seem, every person has value because they are made in God’s image to bring glory to Himself. DR. GEORGIA PURDOM is the first female PhD scientist engaged in full-time research and speaking on the book of Genesis for a creationist organization.
